

**Ventaro:
dust and dirt-free DIY
and lots more besides.**

The new Ventaro system, with innovative pneumatic power system: one tool, five functions.

BOSCH
Technik fürs Leben

The all-in-one that does it all.

The Ventaro system is a sander, high-power pump, vacuum cleaner and toolbox all in one – and much more besides. It has been designed to make your life easier. So for example, the innovative pneumatic power system means that when you are sanding, all the dust is sucked straight into the Ventaro, sparing you the chore of cleaning up after yourself. In fact, any power tool with a dust extraction port can be connected to the Ventaro. So there's no mess, and no fuss.

This even applies to drilling. The ingenious drilling attachment uses suction to fasten itself firmly to the surface you're drilling, so the dust goes straight into the Ventaro.

Dust-free sanding with the PSM 1400 sanding attachment.

Vacuum cleaning with the vacuum cleaning nozzle.

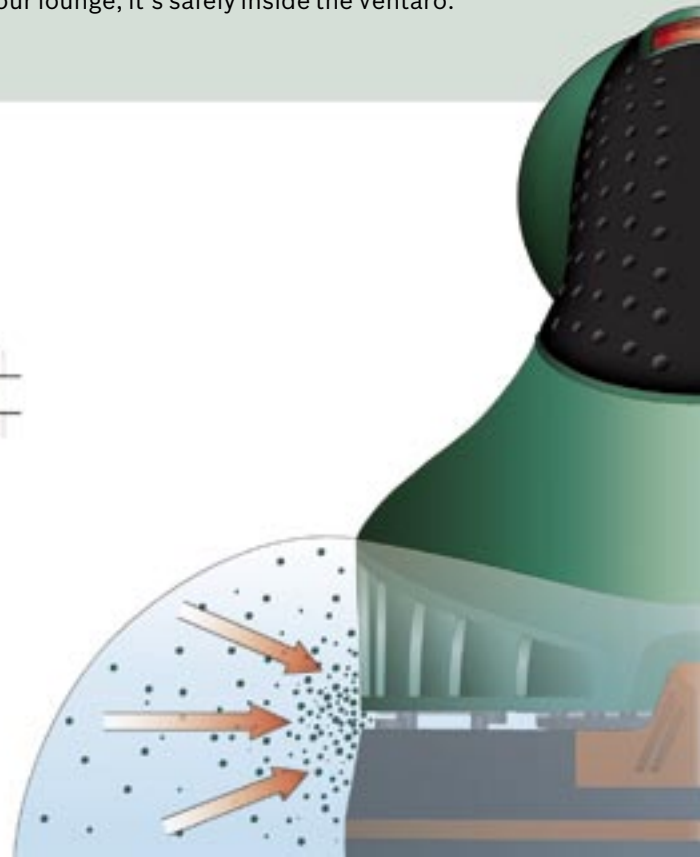

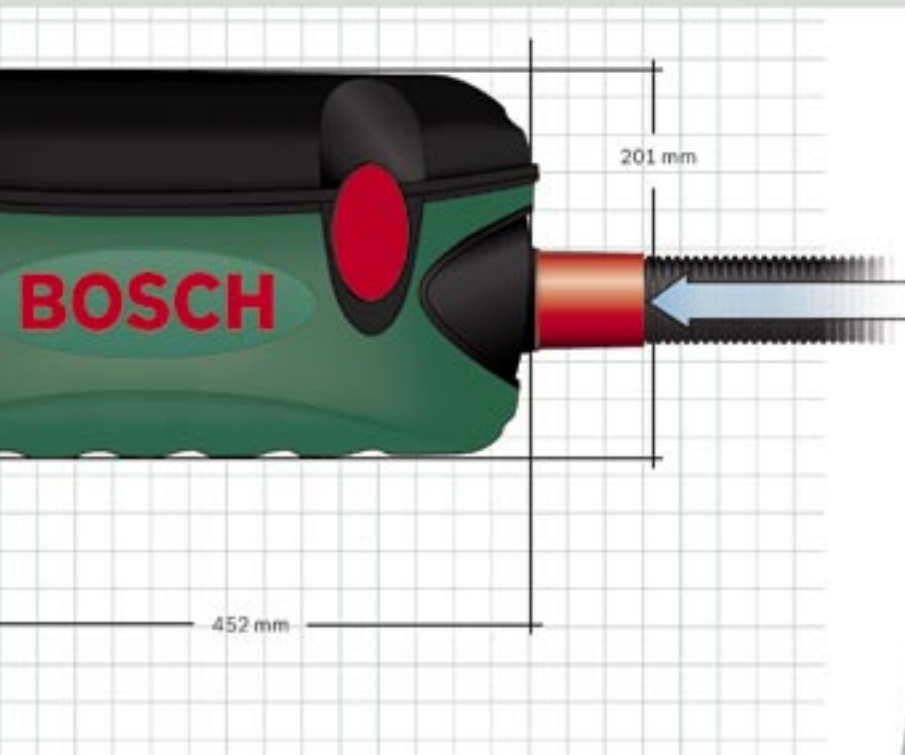

Tool attachment with two adapters of different diameters (19 mm/35 mm).

Dust-free drilling with the drilling attachment.

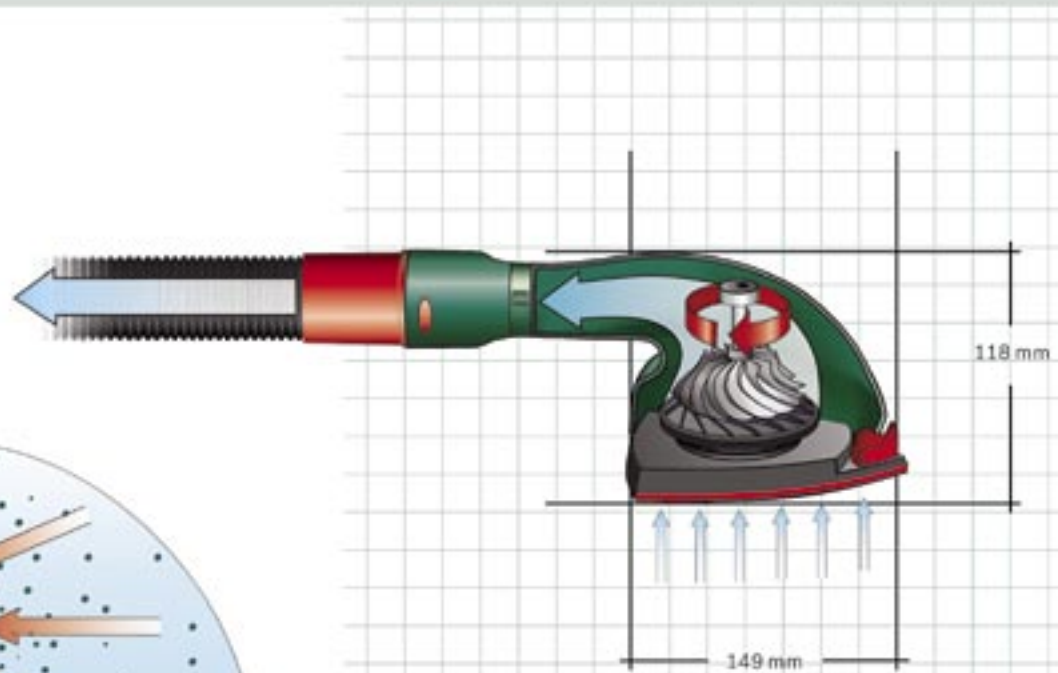

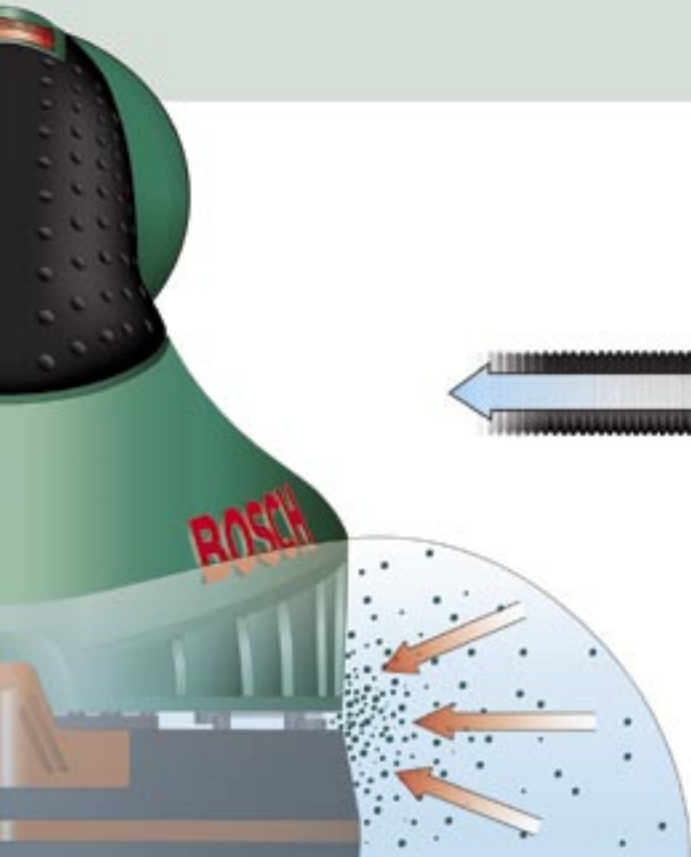

Pump function with the pump nozzle.

Whether you're vacuuming, pumping or sanding, 1,400 watts is all the power you need. The unique thing about the Ventaro is that the sanding attachment doesn't have a motor, but is powered by the suction from the system. The Ventaro's innovative pneumatic power system makes genuinely dust-free sanding not just possible, but convenient and effortless.

Anti Dust Technology means that the dust is sucked up by the sanding attachment as quickly as it is created. In other words, before it has the chance to make a mess of your lounge, it's safely inside the Ventaro.

**1,400 watts of power? Yes.
Motor? No.**

Dust-free sanding – wherever, whenever.

Because the PSM 1400 delivers genuinely dust-free sanding, you're spared the chore of tidying up after yourself.

The PSM 1400 is suitable for sanding surfaces of all shapes and sizes – and there's never any dust.

The PSM 1400 sanding attachment features a Velcro-type fastening system for fast and easy paper changes.

It also means that the paper is much more securely attached to the sanding plate than is the case with conventional sanders.

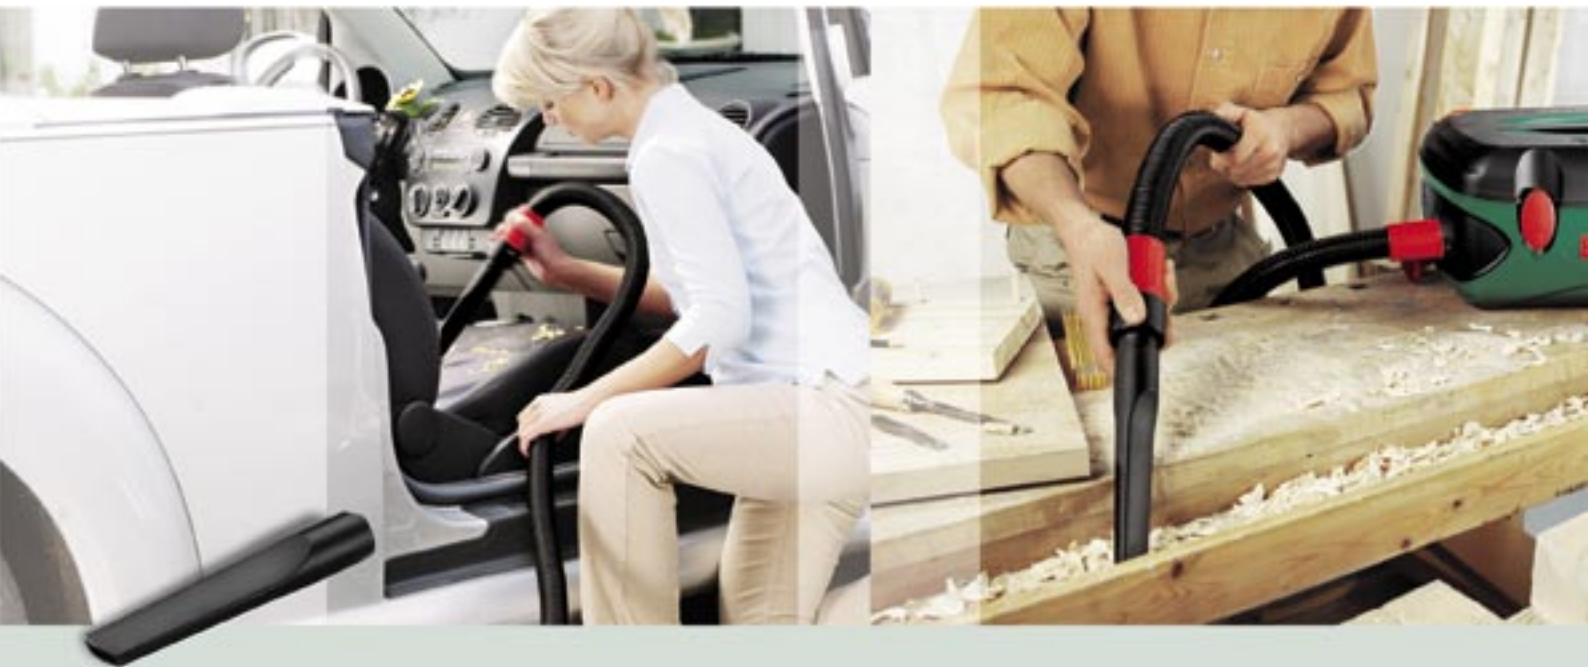

Whether you're sanding wood, painted or varnished surfaces, the delta-shaped sanding plate makes it easy to get into awkward corners. And if the paper is worn at the front, the tool-free SDS-Clic system means you only have to rotate it, and you're ready to continue.

The Bosch Ventaro. It can do everything, while others just suck.

The Ventaro's built-in pump function makes it fast and easy to inflate inflatable mattresses, paddling pools and the like.

The Ventaro is supplied with a vacuum cleaning attachment, turning it into a powerful (1,400 watt) and user-friendly vacuum cleaner with an easy-change dust bag.

Even large wood shavings are no problem for the Ventaro.

A toolbox with a few surprises in it.

Dust-free drilling made simple: switch on the Ventaro, place the drilling attachment where you want to make your hole, and start drilling. Suction holds the attachment firmly in place on any wall or surface, so you've got both hands free to control the drill. Dust is a thing of the past.

The Ventaro can be attached to any power tool with a dust extraction port. So there's no mess, and no fuss.

The supplied adapter means that sawing, planing and many others tasks are now dust-free.

Softgrip

Non-slip surface and ergonomic design for total control.

Bosch Velcro-type fastening system

For fast paper changes and extended paper life.

Sanding plate

Delta-shaped, and rotates through three positions (no tool required), so each sheet of sandpaper lasts three times longer.

Bosch SDS-Clic

Makes it fast and easy to change attachments.

**If there's one thing
it's good at, it's everything.
The Bosch Ventaro.**

Hose

Two metres long, so you can cover a wider area.

Power cord

Three metres in length (stored at centre rear).

Air Powered Technology

With an output of 1,400 watts, it delivers all the power you need to pump, sand and vacuum.

Dust bag

With a capacity of three litres. Can be changed in a matter of seconds.

Storage compartment

The Ventaro doubles as a toolbox, with room inside for the hose, all the attachments, and lots more besides.

It's all here.

Power output	1,400 W
---------------------	---------

Dust bag capacity:	3 l
---------------------------	-----

Ventaro

PSM 1400

Speed	32,000 rpm
--------------	------------

Sanding area	104 cm ²
---------------------	---------------------
